<u>Goals</u>

1. Set up the frame/boilerplate of the app
2. Allow a user to add campers and subsequently add them to groups
3. Allow a user to see a scoreboard with information about teams and how many points each team has
4. Allow a user to add and remove points from each team listed on the scoreboard

<u>Sprint Backlog</u>
Research time (~10 hours)
Set up database (~4 hours)
Set up Python/Flask (~1 hour)
Set up React app (~0.5 hour)
Superusers/Admins should be able to add campers (~4 hours)
Superusers/Admins should be able to add campers to groups/teams (~1 hour)
Users should be able to view a scoreboard with points for each team or camper (~4 hours)
Users should be able to view a scoreboard with points for each team or camper (~2 hours)
